

# CR050WIFI

PROGRAMMABLE THERMOSTAT MULTIZONE WI-FI

- Multi-zone climate thermoregulation  
Class V and Class VIII
- Green System for greater energy efficiency of the systems:
  - reduction of energy consumption of the heating
  - reduction of CO2 emissions into the atmosphere

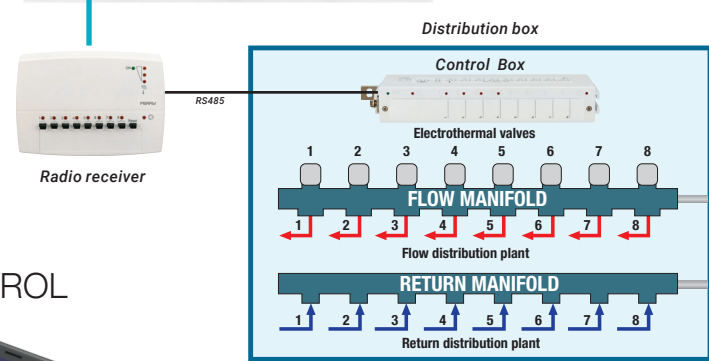

# CR050WIFI - Multizone Climate Thermoregulation

CR050WIFI can be programmed and controlled both locally and remotely via App with cloud access. The 868 MHz band of the CR050WIFI allows you to regulate the temperature in every room of the home

**LEGEND**

- Wi-Fi
- RF 868MHz
- BUS RS485

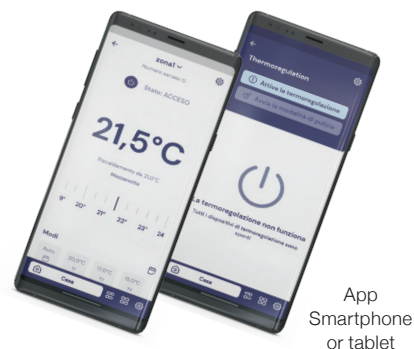

## ON SITE CONTROL

CR051WIFI  
CR052WIFI

## REMOTE CONTROL

App Smartphone or tablet

CR050WIFI is able to thermoregulate any type of installation.

System complying the European Directive (RED)

## THERMOREGULATION

### WIRELESS THERMOREGULATION OF EACH ROOM OR ZONE

CR050WIFI can manage up to a maximum of 8 zones and 16 actuators

With CR050WIFI or Smartphone you can regulate the temperature of each room or zones

SENSORS

ACTUATORS

## HUMIDITY MANAGEMENT

### DEHUMIDIFICATION

The dehumidification function requires the installation of at least one thermohygrometer RXTEUM01 to monitor the relative humidity. CR050WIFI controls the achievement of the dew point by activating the dehumidifiers through the RTX02 radio transceivers. If the action of the dehumidifiers is not sufficient, CR050WIFI stops the thermoregulation of the zone.

### 1TX RXTEUM01

RF zone thermostat with room relative humidity probe.

Equipped with a.c.ombined temperature and relative humidity probe, it monitors the two parameters giving the possibility of controlling both heating and dehumidifier action.

The Perry system, in addition to regulating the dehumidifier, allows the setting of a maximum level of humidity (safety) above which the flow of the refrigerant liquid is interrupted by acting on the collector.

## RENOVATED OR NEW INSTALLATIONS WITH CLIMATE CONTROL WITH RADIANT PANELS

Overview of temperatures regulation

Overview of time profiles and temperature sets

Thermal season selection

By selecting, it changes the management from heating to air conditioning

## Easy Mode

To simplify, it is also possible to activate a practical and simple function called "EASY MODE".  
CR050WIFI will autonomously perform the necessary procedures to obtain the optimal thermal comfort desired in each zone

## Quick functions

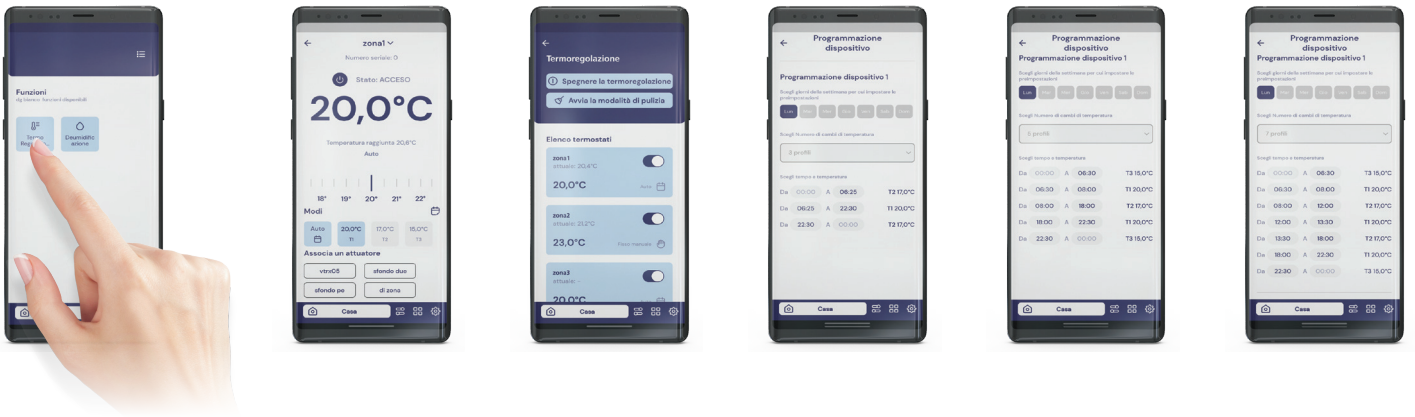

CR050WIFI is equipped with a drop-down menu which can be recalled by scrolling from top to bottom. From this menu with rapid selection the user can access the most used functions to control the entire system:

- IN/OUT function
- Holiday function
- Cleaning function

"Special functions" allow scenarios when cleaning, when leaving or entering the house, or when scheduling vacation times. Everything can be controlled quickly from the CR050WIFI or smartphone.

Easy Mode

Quick functions

By selecting, it changes the management from heating to air conditioning

summer

winter

## GENERAL FEATURES multizone programmable thermostats

- Power supply 230V AC 50Hz/5Vdc
- 4.3" TFT color scrolling touch screen display
- No. 8 programmable zones for hourly profiles on 4 temp. levels
- Zone programming: daily and weekly
- Communication systems:
  - Wi-Fi for internet connection;
  - Wireless RF 868 Mhz for communication with auxiliary equipment
- Calculation of the anti-condensation dew point
- Temperature setting range +4°C ÷ +39°C
- Connection range 30 ÷ 100 m in relation to the wall structure and obstacles inside the rooms
- Accuracy ±0.5 °C
- Gradient 1°K / 15 min
- Regulation type: modulating or ON/OFF
- IP30
- Operating temperature -5°C ÷ +55 °C
- Storage temperature -5°C ÷ +55°C
- Dimensions (L x W x H) 128.5 x 26 x 88.5 mm

### 1TX CR051WIFI Wall -mounted Wi-Fi programmable thermostat with relay output

- Wired relay output 5(3)A 250V a.c.
- Wi-Fi
- Frequency RF 868 MHz
- Input remote temperature probe 1PA STE02 usable as 2nd zone
- Wall installation

### 1TX CR052WIFI Wall -mounted Wi-Fi programmable thermostat with BUS 485 output

- BUS RS485 Output for connection by 1TX MOT1 to the boiler and /or the actuator with the control box
- Wi-Fi
- Frequency RF 868 MHz
- Input remote temperature probe 1PA STE02 usable as 2nd zone
- Wall installation

### 1TX MOT1 OpenTherm module

Compatible boiler brands\*: ARISTON, BALTUR, BAXI, BERETTA, BONGIOVANNI, BUDERUS, ELCO, FERROLI. List updated at the time of printing. For other brands, contact the Perry Electric Technical Assistance Service. In any case, check in advance with the boiler manufacturer the compatibility with the communication system "OpenTherm V2.2" protocol.

\*All brands mentioned are registered trademarks owned by their legitimate owners

- Power supply 230V a.c. 50Hz / 5Vdc 50Hz
- BUS RS485 connection with 1TX CR052WIFI

### 1PA BT050 Table base for multizone programmable thermostat

In the case of installations where 230V power supply to the 1TX CR051WIFI is not possible, it is possible to combine the table base with a plug-in power supply. In this way the product can be placed anywhere in the home. To control the load, use the output relays of the 1TX RTX01DO / 1TX RTX02DO / 1TX RTX0801DO transceivers.

### 1TX RXTEUM01 Wall-mounted thermostat with built-in hygrometer

Regulates the room temperature and through CR051WIFI or CR052WIFI activates the RTX01/02 actuators to control the dehumidifiers.

- Power supply 2x1.5V AA type batteries - Alkaline
- 2 1/3 digital LCD display
- Bidirectional RF868 MHz wireless radio connection
- Connection range 30 ÷ 100 m
- Temperature adjustment range +4 ÷ +39 ° C
- Relative humidity % adjustment range from App
- Accuracy ± 0.1 ° C
- Gradient 1 ° K / 15 min.
- IP 30
- Autonomy about 3 years
- Dimensions (L x W x H) 84 x 23 x 84 mm

### 1TX STX01 RF ambient wall temperature probe

- Power supply 2x1.5V AAA - Alkaline batteries
- 5 digit TRH LCD display shows room temperature, low battery, offset, background noise
- Bidirectional RF868 MHz wireless radio connection
- Connection range 30 ÷ 100 m
- Measuring range -30 ÷ +70 ° C
- Accuracy ± 0.1 ° C
- Gradient 1 ° K / 15 min.
- IP30
- Autonomy about 3 years
- Wall installation
- Dimensions (L x W x H) 40 x 95 x 23 mm

1TX STX03A Built-in RF room temperature probe in 1 civil module, anthracite color  
 1TX STX03B Built-in RF room temperature probe in 1 civil module, white color

- Power supply 230V a.c.
- Bidirectional RF868 MHz wireless radio connection
- Connection range 30 ÷ 100 m
- Measuring range -30 ÷ +70 ° C
- Accuracy ± 0.1 ° C
- Gradient 1 ° K / 15 min.
- IP40
- Installation of 1 civil module in flush-mounted box
- Dimensions (L x W x H) 40 x 95 x 23 mm

For installation it is necessary to purchase finishing front panels compatible with the domestic series on the market.  
 See the Perry configurator: <http://configuratore.perry.it>

1TX VTRX05 Electronic valve for radiators with 868.35Mhz radio transceiver

- Power supply 3V 2x1.5V AA batteries - Alkaline
- Built-in room temperature probe
- functioning with modulating intervention
- Autonomy about 12 months depends on the daily operations
- IP40
- Max pushing force in closing 8 Bar
- Compatible with thermostatic valves with PN (Nominal flow rate) 8 Bar and ΔP (differential) 1 Bar
- Connection range 30 ÷ 100 m
- Battery charger and / or anomalies indication
- Dimensions (L x Ø) 85.5 x 53 mm

1PAVTNN001 Caleffi valves adapters for VTRX05  
 1PRVTRX002 Replacement threaded ring for VTRX05  
 1PRVTRX003 Replacement battery compartment cover for VTRX05

1TX RTX01DO Radio transceiver 1 channel 230V a.c.  
 1TX RTX02DO Radio transceiver 2 channels 230V a.c.

- Power supply 230V a.c. 50 ÷ 60 Hz
- Bidirectional wireless radio RF868 MHz connection
- ON /OFF operation
- Connection range 30 ÷ 100 m
- IP30
- 1TX RTX01DO 1 changeover contact output 5(2)250V a.c. 1 
- 1TX RTX02DO 2 changeover contacts output 5(2)250V a.c.  + 1  pump
- Dimensions (L x W x H) 133 x 90 x 25 mm

1TX RTX0801DO 8-zones radio transceiver + 1 circulation pump output

- Power supply 18V a.c. (from the control box)
- BUS RS485 output for connections with control boxes
- Bidirectional wireless radio RF868 MHz connection
- Connection range 30 ÷ 100 m
- Insulation class III 
- IP30
- Wall mounting
- Dimensions (L x W x H) 133 x 90 x 25 mm

1TX BC0400 4 zones control box  
 1TX BC0800 8 zones control box

- Power supply 230V a.c. 50 ÷ 60 Hz
- Contacts output 8(2)A 250V a.c.
- BC0400 4 polarized NO/NC contacts  
 4  + 1  pump
- BC0800 8 polarized NO/NC contacts  
 8  + 1  pump
- IP 52 with rubber cable glands
- Insulation Class II 
- Box, wall, with brackets installation
- Dimensions (L x W x H) 273 x 69 x 76 mm

1PAPPBC01 Cable glands for control boxes  
 11SEAEDS Electro-thermal actuator for thermostatic valve 230V NC

## ACCESSORIES

1PA STE02 Additional temperature detection probe with 4 m length cable for 1TX CR051WIFI and 1TX CR052WIFI  
 1PRBP01B Replacement base with integrated power supply for 1TX CR051WIFI  
 1PRBP02B Replacement base with integrated power supply for 1TX CR052WIFI  
 1PR PSA01 Replacement batteries type AA for RXTEUM01, VTRX05  
 1PR PMS01 Replacement batteries type AAA for STX01  
 1PR PSR01 Rechargeable AA batteries, blister of 4 pieces. for RXTEUM01, VTRX05  
 1PACB001 Power supply and battery charger for rechargeable batteries

## VTRX05 INTELLIGENT ELECTRONIC VALVE FOR RADIATORS AND TOWEL WARMERS

The most advanced and efficient answer for the thermoregulation of all radiators.

The VTRX05 intelligent electronic valves, installed in radiator systems, can be associated to CR050WIFI for the realization of multimedia multizone systems and/or installed stand alone on radiators/towel warmers of the house.

The VTRX05, installed stand-alone, allow to turn on radiators with precise regulation of temperature set T1 (comfort temperature), T2 (reduction temperature) with the valve frontal buttons.

The VTRX05, installed stand-alone, can be programmed with a daily time profile, to regulate the hourly periods of comfort (T1) and reduction (T2), assuming the function of daily programmable thermostat, applied to each radiator.

### TECHNICAL NOTE

VTRX05 is realized with hardware and firmware solutions that allow to reduce the natural difference between temperature measured by VTRX probe and real room temperature.

Through the valve menu it is possible to access the off-set function for adjustments between the value read by the VTRX temperature probe and the real room temperature.

The VTRX05 valve is realized with modulating operation of the thermostatic valve to minimize the energy consumption of each radiator.

The stand-alone installation of the intelligent electronic valve VTRX05 is easy to use for the reduction of energy consumption from heating of:

- Radiators and towel warmers installed in apartments
- Radiators installed in public places: offices, stores, schools, etc.
- Radiators installed in hotel rooms, retirement homes, etc.

## Advanced independent heating installation with radiators

- ✓ Power supply 230V wall mounting
- ✓ Wire connection with boiler

DETRAZIONE FISCALE 65%

Zone 1

Zone 2

Zone 3

Max 8 zones and max 16 VTRX

### INSTALLATION COMPONENTS

Q.ty		CODE	Description
1		1TXCR052WIFI	Wall -mounted Wi-Fi programmable thermostat with BUS 485 output
1		1TXMOT1	OpenTherm module
16 max		1TXVTRX05	Electronic valve with radio transceiver with room probe and display

#### PLEASE NOTE

To obtain an ADVANCED INDEPENDENT HEATING installation, the rooms must be divided into at least three thermal zones (at least 3 temperature measurement points)

## Advanced independent heating installation with distribution box

- ✓ Power supply 230V wall mounting
- ✓ Wire connection with boiler

### INSTALLATION COMPONENTS

## Independent heating installation with fan coil/splitter

- ✓ Power supply 230V wall mounting
- ✗ Wire connection with boiler

### INSTALLATION COMPONENTS

Q.ty		CODE	Description
1		1TXCR051WIFI	Wall -mounted Wi-Fi programmable thermostat with relay output
7 max		1TXSTX03 A/B 1TXSTX01 1TXRXTEUM01	Built-in RF room temperature probe in 1 civil module RF ambient wall temperature probe Wall-mounted thermostat with built-in hygrometer
16 max		1TXRTX01DO	Radio transceiver 1 channel 230V a.c.
8 max		1TXRTX02DO	Radio transceiver 2 channels 230V a.c. + aux OUTPUT
1		1TXRTX01DO	Radio transceiver 1 channel 230V a.c.

The use of RTX transceivers allows the connection of MAX 16 RTX01 and MAX 8 RTX02, to each of which an unlimited number of fan-coils can be connected in parallel. RTX01 and RTX02 can be installed in the same climate zone.

### Example of internal FAN COIL installation

**RTX01DO**  
1 output relay  
for valve and  
fan control  
simultaneously

**RTX02DO**  
2 output relays:  
1 for valve control  
1 for fan control  
With intervention delay that  
can be set between control of  
the valve and the fan.

### Other uses for RTX

#### Example of installation with BOOST

**MAX 1 RTX01  
function BOOST**

In case of heating or cooling systems with slow dynamics, the CR050WIFI can control 1 RTX01 connected to the additional units: inverter, heat pump, pellet stove...

#### Example of installation with PUMP

**MAX 1 RTX01  
function pump**

When no zone requires heat, CR050WIFI controls the RTX01 configured for pump control, instantly interrupting (or with an activation delay) the operation of the circulation pump.
